1 PRODUCT AND COMPANY IDENTIFICATION

Common Name: Arborite® DecoMetal

Manufacturer: ARBORITE, DIVISION OF WILSONART CANADA ULC
385 LAFAUER
LASALLE (QUÉBEC) CANADA H8R 3H7
INFORMATION PHONE: 800-996-0366

Trade Name: Arborite® DecoMetal

Material Uses: Decorative Surfacing

Revision #: 4

In Case of Emergency Contact:
1 613 996 6666 Transport Canada's Canadian Transport Emergency Centre (CANUTEC)

2 HAZARDS IDENTIFICATION

Route of Entry: None for product as sold. For dust, chips, or fumes generated during fabrication operations:
  eye contact, skin contact, and inhalation.

Target Organs: None for product as sold. For dust, chips, or fumes generated during fabrication operations:
  eye contact, skin contact, and inhalation.

Inhalation: No hazard for product as sold. Fabrication operations such as milling, cutting, grinding,
  welding, brazing, etc., may produce dust, chips, or fumes that may be irritating or harmful if
  inhaled. See Section 8.

Acute Effects: Excessive inhalation of fumes from freshly formed metal oxide particles may
  produce an acute reaction known as "metal fume fever". Symptoms include chills and fever
  similar to flu symptoms, dryness and irritation of the throat, metallic taste in the mouth,
  followed by muscle weakness and pain. Symptom onset after excessive exposure to fumes is
  generally a few hours after exposure and lasting 12 to 48 hours.

Chronic Effects: Chronic inhalation of metallic fumes is associated with the following
  conditions. Iron oxide fume inhalation is associated with the development of benign
  pneumoconiosis, known as Siderosis. Iron oxide is listed as an IARC Group 3 material. The
  health hazards associated with the exposure to Chromium are dependent upon the oxidation
  state. The metal form (as it exists in this product) is of low toxicity.

Skin Contact: Solid sheet may be abrasive to, or cut skin. Fabrication operations such as milling, cutting,
  grinding, welding, brazing, etc., may produce dust, chips, or fumes that may be irritating.

Eye Contact: No hazard for product as sold. Fabrication operations such as milling, cutting, grinding,
  welding, brazing, etc., may produce dust, chips, or fumes that may be irritating.

Ingestion: Not an expected route of entry.

HMIS (United States): NFPA (United States): WHMIS (Canada): D2B

Material may contain trace or residual elements. The following are typical percentages for the elements identified: Boron – 0.001%, Calcium – 0.0003%, Molybdenum – 0.006%, Niobium (Columbium) – 0.04%, Phosphorus – 0.04%, Sulfur – 0.015%, Tin – 0.004%, Titanium – 0.06%, and Vanadium – 0.001%.

4 FIRST AID MEASURES

Inhalation: No hazard for product as sold. Fabrication operations such as milling, cutting, grinding, etc., may produce dust or chips that may be irritating or harmful if inhaled. If irritation persists, seek medical attention.

Skin Contact: Solid sheet may be abrasive to, or cut skin. Fabrication operations such as milling, cutting, grinding, etc., may produce dust or chips that may be irritating. If irritation persists, seek medical attention.

Eye Contact: No hazard for product as sold. Fabrication operations such as milling, cutting, grinding, etc., may produce dust or chips that may be irritating. For dust or chips, flush eyes with water. If irritation persists, seek medical attention.

Ingestion: Not an expected route of entry with normal use of product.

5 FIRE FIGHTING MEASURES

Flash Point: Not Applicable. LEL: Not Applicable.
Flash Point Method: Not Applicable. UEL: Not Applicable.
Autoignition Temp.: Not Applicable.
Burning Rate: Not Applicable.
Use extinguishing media appropriate for surrounding fire. Wear fire protective equipment appropriate for the surrounding fire. Do not release runoff from fire control measures to sewers and/or waterways.

**Unusual Fire and Explosion Hazards**

Product as sold does not present an explosion hazard. Finely divided dust generated by fabrication operations such as milling, cutting, grinding, etc., can create an explosion hazard if the airborne dust concentration exceeds 900 grams per cubic meter and it contacts an ignition source greater than 8 Joules. (A person standing in a uniformly dispersed dust cloud of 50 grams per cubic meter will not be able to see his/her outstretched hand.)

<tr>
<td>Materials to Avoid (incompatibility):</td>
<td>None.</td>
</tr>
<tr>
<td>Hazardous Decomposition Products:</td>
<td>Coatings may yield carbon oxides (CO and CO₂). Thermal oxidation of product can produce fumes containing the oxides of iron, zinc, and aluminum as well as other metal elements present in the product.</td>
</tr>
<tr>
<td>Hazardous Polymerization</td>
<td>Will not polymerize.</td>
</tr>
</tbody>
</table>

11 TOXICOLOGICAL INFORMATION

<table>
<thead>
<tr>
<th>Property</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Toxicity to Animals</td>
<td>This product has not been tested for animal effects. This product, as sold, is not expected to be toxic to animals.</td>
</tr>
<tr>
<td>Toxicity to Humans</td>
<td>This product has not been tested for human effects. This product, as sold, is not expected to be toxic to humans.</td>
</tr>
</tbody>
</table>

This product, as sold, is generally classified as an “article” and does not constitute a hazardous material in solid form under the terms of the OSHA Hazard Communications Standard. Any article manufactured from this solid product would generally be classified as non-hazardous. However, some metallic elements contained in these products have been determined to be toxic and subject to regulatory control. These elements can be emitted as airborne contaminants under certain processing conditions such as, but not limited to, cutting, grinding, milling, machining, brazing, melting, welding, or burning.

Toxicity Data*: No LC₅₀ or LD₅₀ has been established for the product as sold. Information for elemental components is as follows: Iron LD₅₀ – 30 g/kg oral (rat). Aluminum LD₅₀ – No Data. Boron LD₅₀ 2000 mg/kg oral (mouse). Calcium LD₅₀ – No Data. Carbon LD₅₀ – No Data. Chromium LD₅₀ – 71mg/kg GIT oral (human). Columbium LD₅₀ – No Data. Copper LD₅₀ – 120 µg/kg GIT ipr (rat). Manganese LD₅₀ - 9g/kg oral (rat). Molybdenum LD₅₀ - 114 mg/kg ipr (rat). Nickel LD₅₀ – 5 mg/kg oral (guinea pig). Phosphorus LD₅₀ – No Data. Silicon
Environmental and Regulatory Information

**Carcinogenic Effects:** Chromium (base metal), nickel (base metal), and styrene (resin coating) have been classified 2B (Possible for human) by IARC.

**Mutagenic Effects:** Not Available.

**Teratogenic Effects:** Not Available.

**Ecotoxicity:** Not Available. Product as supplied is not considered ecotoxic. Individual components of the product have been found to be toxic to the environment.

**BOD5 and COD:** Not Available

**Biodegradable / OECD:** Not Available

**Mobility:** Dust and particulate may migrate into soil and groundwater and be ingested by wildlife or absorbed by plants.

**Toxicity of the Products of Biodegradation:** Not Available

**Special Remarks on the Products of Biodegradation:** Not Available

**Disposal Considerations**

Waste from the product is considered a solid waste, not a hazardous waste. Any waste or excess product can be recycled for further use or disposed in an appropriately permitted waste landfill.

Dispose of in accordance with Federal, State, and local regulations.

**Transport Information**

**Restrictions:** None known.

**DOT Requirements:** Not a DOT controlled material (United States).

**ADR Requirements:** Not an ADR controlled material (Europe).

**IMDG Requirements:** Not an IMDG controlled material.

**IATA Requirements:** Not an IATA controlled material.

**Marine Pollutant:** Not expected to be a marine pollutant.

**Regulatory Information**

**U.S. Federal Regulations**

This product as sold is not subject to regulation. However, components of said product are regulated as follows:

- **TSCA inventory:** The chemicals in this product are listed.
- **SARA 302/304/322/312 Extremely hazardous substances:** Chromium, Copper, Manganese, Nickel, Phosphorus, and Zinc are listed.
- **SARA 302/304 Emergency planning and notification:** Chromium, Copper, Manganese, Nickel.
- **SARA 302/304/311/312 Hazardous chemicals:** Chromium, Copper, Manganese, Nickel.
- **SARA 311/312 SDS distribution, chemical inventory, hazard identification:** None.
SARA 313 Toxic chemical notification and release reporting: Aluminum (fume or dust), Chromium, Copper, Manganese, Nickel, Phosphorus, and Zinc (fume or dust) are listed.
RCRA: Chromium and Nickel are listed.
CWA 307: Chromium, Copper, Nickel, and Zinc are listed.
CWA 311: Phosphorus & Styrene.
SDWA: Aluminum, Boron, Chromium, Copper, Iron, Manganese, Molybdenum, Nickel, Vanadium, & Zinc are listed.
CAA 112 Accidental release prevention: Styrene is listed.
CAA 112 Regulated flammable substances: None.
CAA 112 Regulated toxic substances: None.

International Regulations
DSL (Canada) – None.
EINECS – None.
WHIMS (Canada) – Classified as D2B.

State Regulations
Massachusetts RTK: None.
Minnesota: None.
New Jersey RTK:
   Environmental Hazardous Substance: Aluminum (Fume or dust), Chromium, Copper, Manganese, Nickel, Phosphorus, Vanadium (fume or dust).
Pennsylvania RTK:
   Hazardous Substances: Calcium, Molybdenum, Silicon, Sulfur, and Tin.
   Environmental Hazards: Aluminum, Chromium, Copper, Manganese, Nickel, Phosphorus, Vanadium, and Zinc.
   Special Hazard Substances: Chromium and Nickel.
Rhode Island: None.
California Proposition 65: This product contains the following ingredients know to the state of California to cause cancer or reproductive toxicity:
   Chromium (CAS 7440-47-3) in trace amounts.
   Nickel (CAS 7440-02-0) in trace amounts.
   Lead (CAS 7439-92-1) in trace amounts.
