Omega Splashbacks with BB Complete

Product description

Omega laminated splashbacks are constructed using high pressure laminates bonded to front and back of standard MDF using waterproof adhesive.
BB Complete is a high performance, single part, moisture curing hybrid adhesive, colour match sealant.
BB Complete is used to install the Omega splashbacks.

Material Classification

Laminates are classified D-s2, d0 as specified by supplier and conforms to BS EN 438
All timber based materials including high pressure decorative laminates are in compliance with European Timber Regulation 995/2010 and are sourced from PEFC Certified, or other Chain of Custody Certified or Controlled Wood supplies.

Substrate is classified Class E as stated by the supplier

Bonding adhesive used between the substrate and laminate conforms to IMO FTPC Part 2 & Part 5 / Approval as per See-BG test certificate for international use according to module B as specified by the adhesive supplier

BB Complete is temperature resistant between -40°C and 90°C.
