

Wilsonart® Solid Surface Sinks Care & Maintenance

General Cleaning

We thank you for selecting Wilsonart® Solid Surface sinks or lavatory bowls for your home. Providing minimal care and proper maintenance, your Wilsonart Solid Surface sink or bowl will look and perform for many years to come.

Wilsonart Solid Surface sinks and bowls are composed of a proprietary mixture of resins and minerals. Wilsonart Solid Surface sinks and bowls are completely homogeneous and are very hygienic, highly stain resistant, and extremely durable. The full-toned color has a consistent, uniform pigment throughout the thickness of each bowl. Its luxurious matte finish enables the sink to keep its beauty for years with minimum day to day care and maintenance.

There may be a slight variation in color when sinks and lavatories are bonded to a similar Wilsonart Solid Surface solid color panel. This is considered normal and not a color issue.

Wilsonart® Solid Surface sinks and bowls may be cleaned with warm water and mild soaps, such as those used for hands and dishes. Mild abrasive cleaners such as Bon-ami®, Comet® or Soft Scrub® also work very well.

For stubborn residue, apply one of the mild abrasives cleaners above and with a green Scotch-Brite™ pad, buff in a circular motion over the entire sink to blend finish.

Simple Precautions

- Run warm water if pouring boiling water in sink
- Allow cookware to cool before placing in sink
- Do not expose the surface to harsh chemicals, such as paint remover, turpentine, nail polish remover (acetone) or stove and drain cleaners. If the chemicals come in contact with the surface, immediately wash them off with water, using appropriate safety measures to avoid injury
